Section 7	Handling and Storage		
	7.1 Precautions for safe handling Avoid contact with skin and eyes. Avoid inhalation of vapour or mist. Normal		
	measures for preventive fire protection. 7.2 Conditions for safe storage, including any incompatibilities		
	Store in cool place. Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. **Recommended Storage Temperature:** On receipt store between 2-8°C		
	7.3 Specific end uses Apart from the uses mentioned in section 1.2 no other specific uses are stipulated.		
Section 8	Exposure Controls / Personal Protection		
	8.1 Control parameters		
	Components with workplace control parameters 8.2 Exposure controls Appropriate engineering controls		
	Avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after		
	handling the products.		
	Personal protective equipment		
	Hygiene measure Immediately change contaminated clothing. Apply preventive skin protection. Wash hands and face after		
	working with the product.		
	Eye/face protection		
	Tightly fitting saftey goggles; Faceshield (8-inch minimum). Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166 (EU). Skin protection		
	Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands. The selected protective gloves have to satisfy the specifications of EU Directive		
	89/686/EEC and the standard EN 374 derived from it.		
	Body protection		
	Complete suit protecting against chemicals. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace. **Respiratory protection**		
	Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU). Environment exposure controls		
	Do not empty into drains.
