Section 8	Exposure Controls / Personal Protection				
	8.1	Control parameters Components with workplace control pa Exposure controls Appropriate engineering controls	nrameters		
		Avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after handling the products.			
		Personal protective equipment			
		<b>Hygiene measure</b> Immediately change contaminated clothing. Apply preventive skin protection. Wash hands and face after working with the product.			
		Eye/face protection  Tightly fitting saftey goggles; Faceshield (8-inch minimum). Use equipment for eye protection tested and			
		approved under appropriate government standards such as NIOSH (US) or EN 166 (EU).			
		Skin protection  Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands. The selected protective gloves have to satisfy the specifications of EU Directive  89/686/EEC and the standard EN 374 derived from it.			
		Body protection			
		Complete suit protecting against chemicals. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.			
		Respiratory protection  Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multipurpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).  Environment exposure controls
