	Appropriate engineering controls			
	Handle in accordance to general industrial hygiene and safety practice. Wash hands before breaks, immediately after handling the products and at the end of workday.			
	Personal protective equipment			
	Eye/face protection			
	Safety glasses with side-shields conforming to EN 166 Use equipment for eye protection tested and			
	approved under appropriate government standards such as NIOSH (US) or EN 166 (EU). Have eye-washing			
	facilities readily available where eye contact can occur.			
	Skin protection			
	Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without			
	touching glove's outer surface) to avoid skin contact with this product. Dispose contaminated gloves after			
	use in accordance with applicable laws and good laboratory practices. Wash and dry hands. The selected			
	protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374			
	derived from it.			
	Body protection			
	Complete suit protecting against chemicals. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace. <i>Respiratory protection</i>			
	Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator			
	type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. Use			
	respirators and components tested and approved under appropriate government standards such as NIOSH			
	(US) or CEN (EU).			
	Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.
